PROFILE

Motivated software engineering graduate with practical experience building responsive web applications. Comfortable working with PHP, Laravel, MySQL, JavaScript, and modern development tools. Enjoys solving problems, learning new technologies, and working collaboratively on real-world projects.

TECHNICAL SKILLS

Languages PHP, JavaScript, HTML5, CSS3, SQL

Frameworks Laravel, Bootstrap, Livewire

Databases MySQL, PostgreSQL

Tools Git, GitHub, VS Code, Docker

Other REST APIs, MVC architecture, responsive web design

EXPERIENCE

Junior Web Developer Intern — BrightWeb Solutions

Jun 2025 – Aug 2025 | Manchester, UK

- Developed and maintained Laravel-based web applications for internal business workflows.
- Created reusable components and improved database queries using MySQL and Eloquent ORM.
- Fixed bugs, tested new features, and collaborated with senior developers through Git and GitHub.
- Helped improve responsive layouts and usability across desktop and mobile devices.

Freelance Web Developer — Self-employed

Jan 2024 – May 2025 | Remote

- Built small business websites and custom admin dashboards using PHP, Laravel, and Bootstrap.
- Integrated REST APIs and implemented authentication, validation, and CRUD functionality.

EDUCATION

BSc (Hons) Software Engineering — University of Manchester

2022 – 2025

Relevant coursework: Web Development, Database Systems, Software Engineering, Algorithms, Computer Networks.

PROJECTS

JobHunter — Job Recruitment Platform

Designed a recruitment platform with job listings, candidate profiles, applications, authentication, and an administrative dashboard. Built the backend using Laravel and MySQL with a responsive frontend.

Task Management System

Created a web application for managing projects, tasks, deadlines, and team members with role-based access control.

CERTIFICATIONS

- Responsive Web Design — freeCodeCamp (2024)
- PHP & MySQL Development — Online Training Certificate (2024)
